

PACCAR AXLES

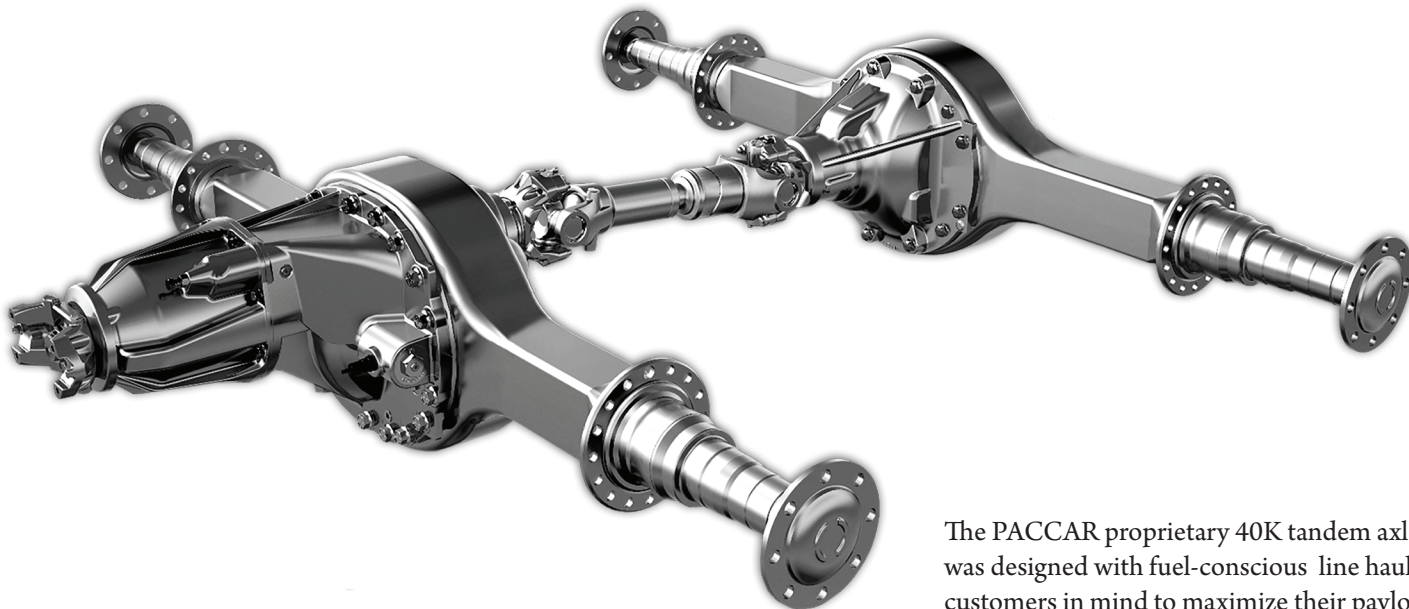

POWERED BY QUALITY

PACCAR AXLES

THE NEXT GENERATION DRIVE AXLE IS HERE

The PACCAR 40K tandem axle is the industry's premier line haul axle. Innovative technologies and advanced manufacturing processes deliver a fuel efficient, light weight design resulting in a lower cost of ownership. With a first-of-its-kind pinion thru-shaft design, it keeps loads moving forward efficiently and reliably. The PACCAR 40K tandem axle, Powered by Quality.

The PACCAR proprietary 40K tandem axle was designed with fuel-conscious line haul customers in mind to maximize their payload.

PACCAR AXLE HIGHLIGHTS

- Durable Pinion Thru-Shaft Design Improves Internal Efficiencies
- Spiral Bevel Gearing Optimizes Inter-Axle Driveline Angles
- High Efficiency Pinion and Differential Bearings Reduce Power Losses
- Advanced Laser Welding Eliminates Internal Fasteners
- Driver Controlled Forward Axle Differential Lock
- Advanced Manufacturing Processes Achieve up to 150 lbs. Weight Savings
- Design Efficiencies Contribute to up to 1% Fuel Economy Improvement

SPECIFICATIONS

GCW	80,000 lbs.	Straight Torque Rating	1,650 lb.-ft.
GAWR	40,000 lbs. Tandem	Multi-Torque Rating	1,750 lb.-ft.
Ratio Range	2.47 to 3.70	Warranty	5 Years/750,000 Miles
